

Help The Homeless

L I G H T P A P E R

"Every human being has the right to a fair chance in life. However, around the world, millions are being left behind – disadvantaged, endangered and deprived of basic necessities they need to thrive in the modern world. We can make a change by investing in local and global communities where the poorest people live. We can not only improve their lives but also the broader community. Let us break the vicious cycle of poverty."

-The Founders

INTRODUCTION:

The team of **Help The Homeless Coin** is a collective of individuals who are using block chain technology that they know to help aid the homeless population around the globe. Each team member has their *own story* and what this means to them, but they will all tell you, it is the right thing to do and without humanity helping each other, the world will fall apart and all is lost. Each team member has had their own trials with digital currency as well as mining digital currency so the team members know what to give back to their community and the potential impact that digital currency brings to the world and that's when the idea to bring Help The Homeless Coin to life was born. The core members believe success comes from not over doing it and keeping things as simple as possible this way a bigger impact can be made and more resources are available with management spent on doing things the right way the first time.

Help The Homeless Coin or HTH Coin is a digital currency with the goal of helping those in need or are in a situation where they can no longer support themselves. We will actively visit local homeless shelters and other organizations and show them how HTH Coin can help make difference and be a source of funding towards their organization. HTH Coin also plans on donating to organizations through their **Charity Fund**.

The HTH Coin team felt that the only way to succeed and make a name for itself is to set the example and build off of legitimate practices of a **NO ICO** or **PRESALE**. The team has paid for everything out of their own pockets to further show transparency and to let the community know the team has paid for listing on the Crypto-Bridge Exchange prior to launch of the blockchain as well, which helps to further solidify it's goal of true legitimacy in the digital currency market as a coin that this is a serious project and we believe in ourselves to hit the goals we set. The being bought and sold as well as having a profitable mining status.

MINING:

Mining HTH Coin is a primary focus of the team. The team knew that the miners would come if the rewards were good, but the rewards also need to be split with the **Charity Fund** so the team has decided that a percentage was taken out prior to being distributed to the miners. The rewards that the miners receive are generous thus the miners come to work on our block chain. The miners have a choice of the different pool providers we have in our community or they may **solo mine** if they choose to do so. Our support is available 24 hours a day for those who need help with configurations or pool setup for new pool owners. We cater to all needs pertaining to Help The Homeless Coin.

MASTERNODES:

On July 19, 2018 Help The Homeless Coin updated their wallets to allow for Masternodes to be active on the network for users. Masternodes allow for a simple way to lock coins way on the network and gain interest payments on the amount of coins locked away. Masternodes are a way of helping to ensure a stable block chain while rewarding those who have one. Masternodes are also a way that the team can ensure automatic weekly or daily donations to organizations can be made.

CHARITY FUND:

For every block mined, HTH Coin will take 25% block reward for the **Charity Fund** and Development costs, this way we can keep actively developing HTH Coin all the while supporting charity along the way. These funds are sent to a wallet automatically and will be distributed to charity organizations worldwide. The HTH website can provide you with information on how much has been raised to date for charity as well as real time market price. We stress the importance of transparency and we build our project around it. HTH data is recorded on the block chain and visible for all to see. As this process matures and price/value increases, the team will allow the community to put requests in for suggesting which charities to donate too. Any one may donate to the **CHARITY FUND**.

You may also support HTH Coin in other ways such as donating to one of our partners who accept HTH Coin. We will have more organizations who will accept HTH as donations in the near future! There are plenty of other ways to get involved with our partners so please reach out to us!

NONPROFIT:

Help The Homeless Worldwide A NJ Nonprofit Corporation was created to help solidify a first for digital currency as being the first digital currency to focus on ***one issue*** rather than be an all around charity. Our Nonprofit was also formed as a means of furthering our mission to those who do not understand digital currency by giving them a first hand look as well as education on how digital currency works. The team has Federal Tax Exemption Status commonly known as 501(c)(3) Status within the United States of America which means that donations can be accepted and will be tax deductible for those who donate a certain amount.

By obtaining Nonprofit Status the team has access to grants and other sources of funding to help facilitate our goals in the fight for giving those who need help a fair chance. Please visit [Help The Homeless A NJ Nonprofit Corporation](#) for more information.

FEATURES:

- *Guaranteed charity fees directly from the block chain*
- *Development fun*
- *Active community with an online and real world presence*
